PROGRAM IMPACT :

In Q3 2026 the MathFit Training Academy certified **400 Certified Cuemath Coaches** — its best quarter yet.

MathFit Mentors train the candidates who have cleared the Cuemath Tutor Screening (communication test, math test and interview). It is not an easy job: engage each prospective candidate, run their own schedules alongside the candidates' without missing a beat, and take session after session of training and simulation in the Cuemath way, with strong feedback loops — the north star being graduation with flying colours at minimum TAT, to final certification as a business-ready Certified Cuemath Coach.

Of this group, these three are our star Mentors — 47% of all teachers certified this quarter, and half the output of the core team of eight.

GOING THE EXTRA MILE

They take intervention calls and counsel candidates who stall, personalise feedback and sessions to each candidate's gaps, and run mocks in evenings and on weekends so working professionals can finish. They stay with graduates until the first class is taught. And in crunch weeks they step forward to role-play and review for other Mentors' candidates — ownership of the Academy's number, not just their own.
